

ACTION RESEARCH

The Common Good Awareness Project

Start

Workshops
in how we
go about it

What do we want to do?

Action research is about researching into doing something. For instance Rebuilding the old farmhouse in Elder park community garden. What are the questions we would need to ask the community about such an idea.

Learning
different skills
to carry out
work

Asking questions

Talking to local people, groups, organisations and asking how they could or would want to get involved. Put on events and highlight some of the possibilities for getting involved. Find out what makes the community tick and build a vision of what is needed.

Acting on what we find

Using our findings to build the capacity to carry out the work. Creating the understanding of why we are doing what we are doing. And involving as many of the community as possible in the project

Working in
building
commons for
our kids
